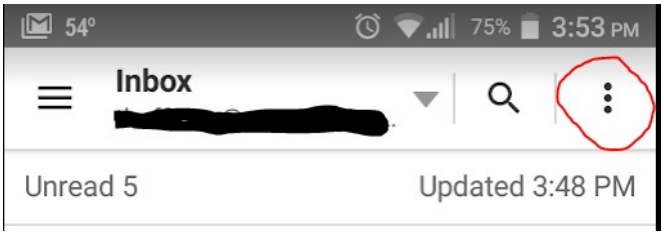
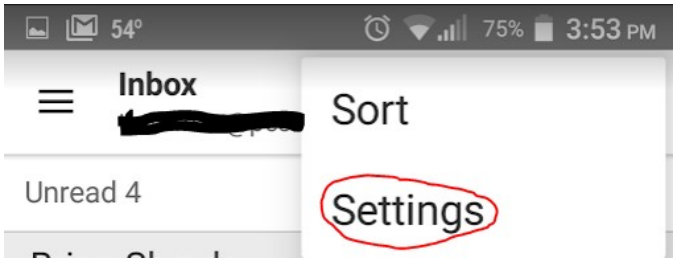
Energize E-mail Setup for Android

***PES Energize is not responsible for the setup of e-mail on your personal mobile devices. This document simply serves as a guide to assist you in accessing your email on these devices. ***

1. Open the Android Mail app

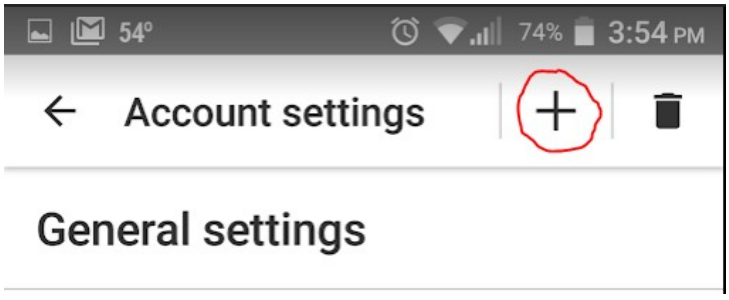
2. Click the settings icon at the top right.

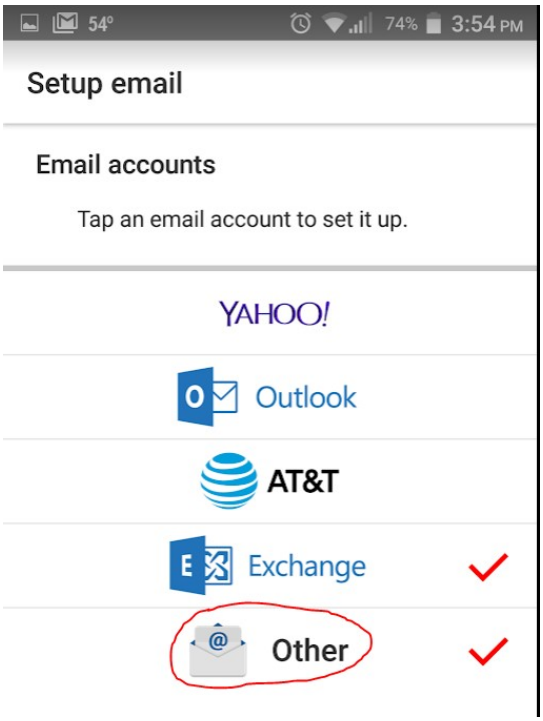




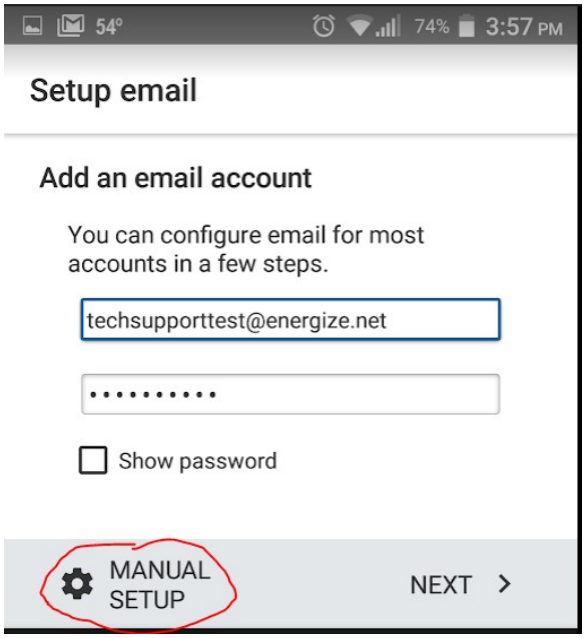
3. Tap the settings

4. Select “Add Account”(+).



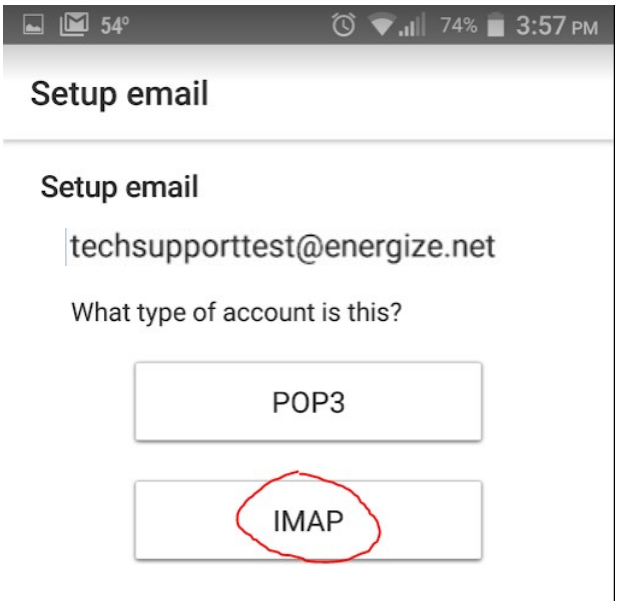


5. Select “Other”.



6. Fill in your e-mail address and password

Then tap “Manual Setup”.



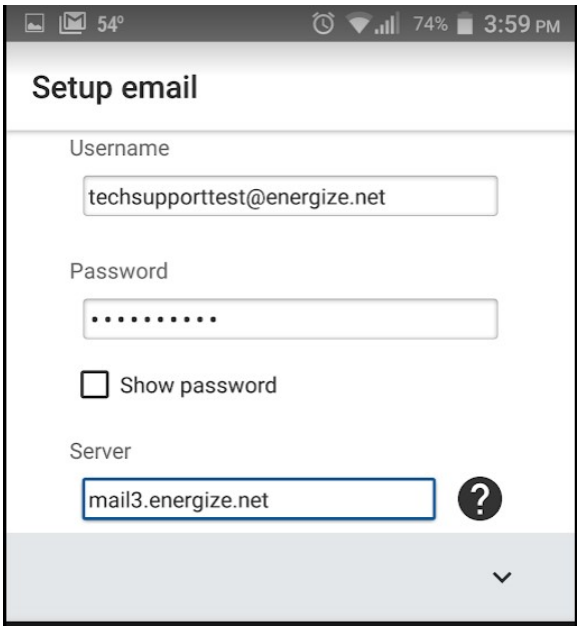
7. Choose “IMAP”.

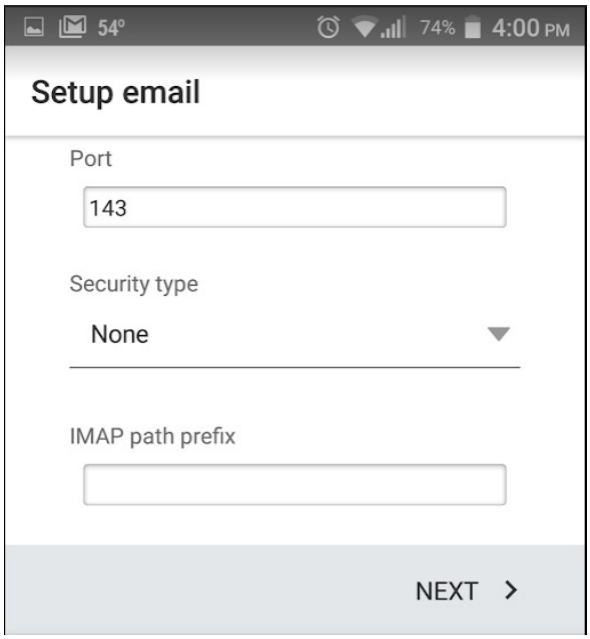
8. Account Settings

User Name: full email address

Password: (you must know your password to continue)

Server: mail3.energize.net





9. Select “None” for security type. Port number will be set automatically. Leave IMAP path prefix blank.

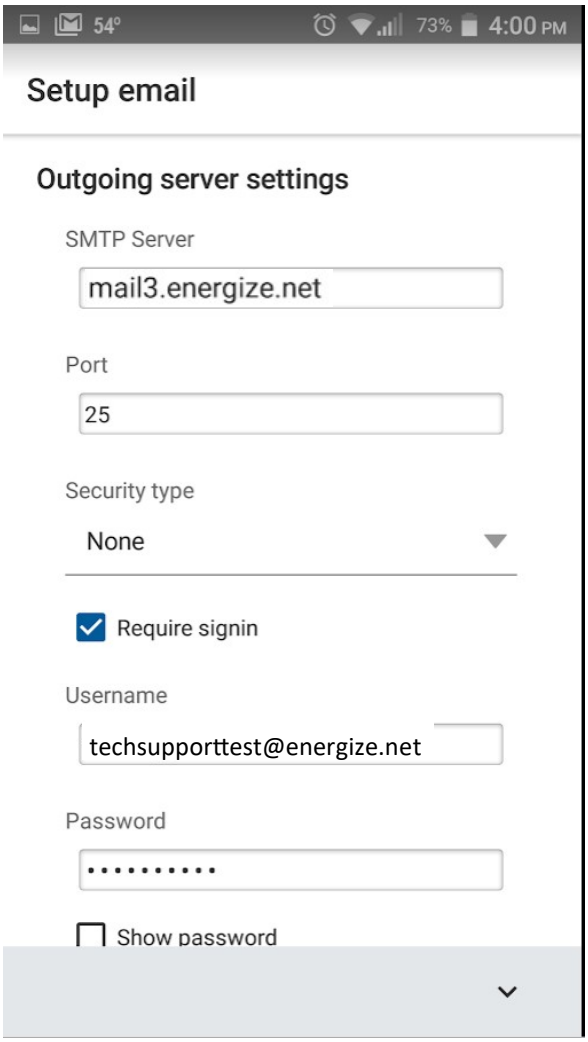
Tap “Next”.

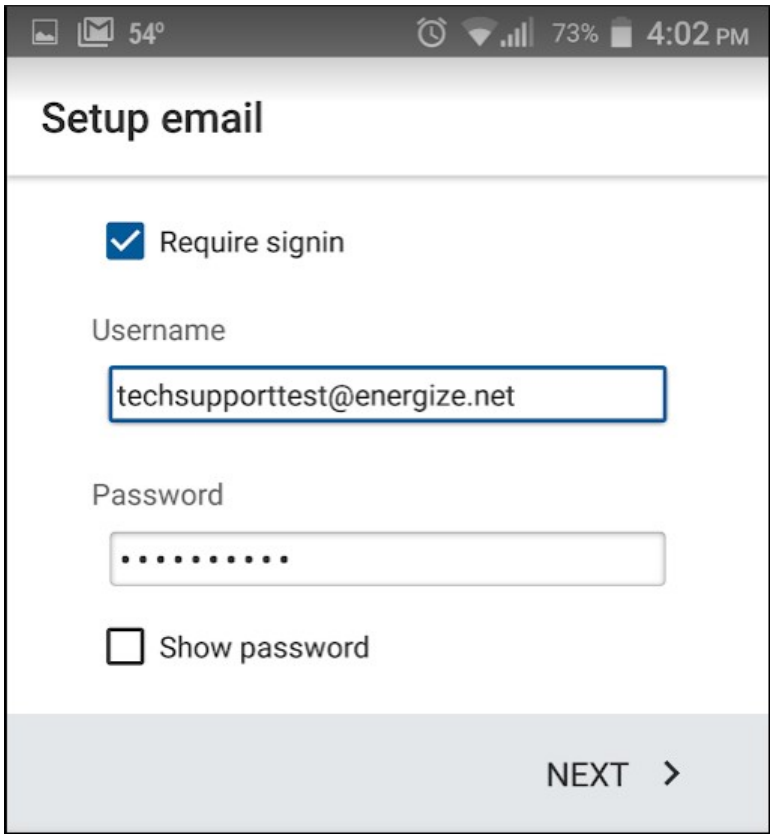
10. Continue filling in outgoing server settings.

User Name: full email address

Password: (you must know your password to continue)

Server: mail3.energize.net





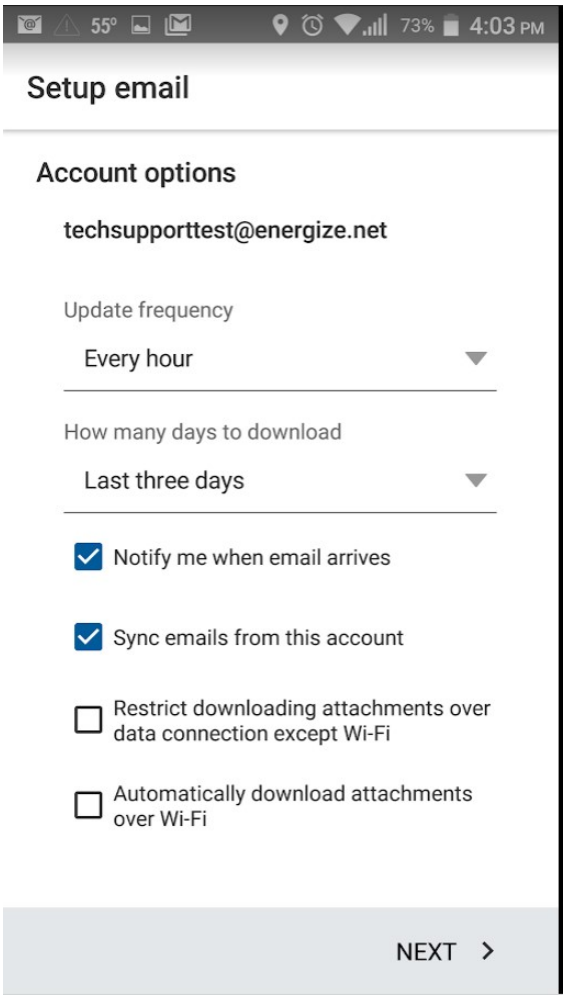
11. Tap “Next”.

12. “Sync emails from this account must be checked!”

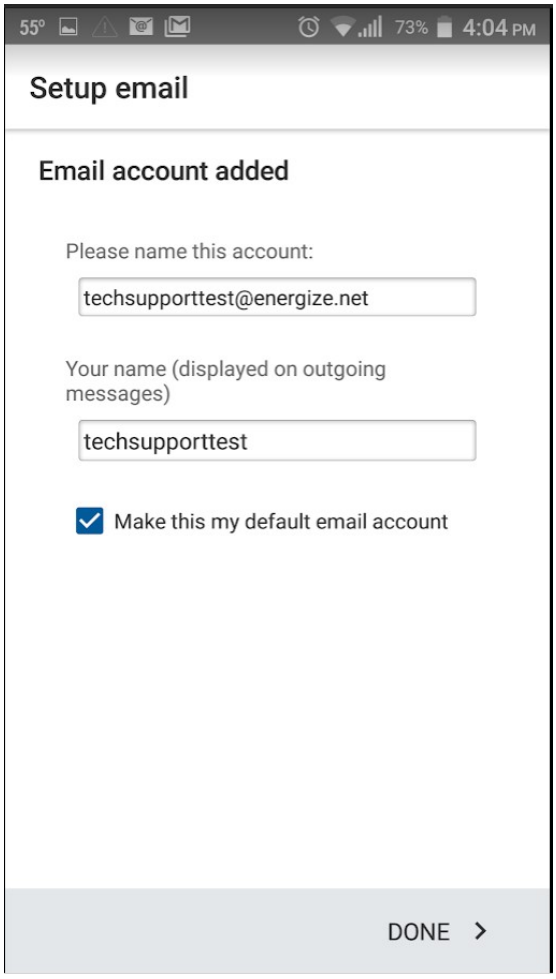
Configure the remaining settings based on your personal preference.

Note: ***Update frequency can affect battery life. ***

***The two attachment settings affect your wireless data plan usage. ***



Tap “Next”.



13. You can name this account any way you wish. It is only a label for you to identify it.

Check “Make this my default account if you want all e-mail sent from your Energize account by default. If you prefer to have your Gmail, Corporate account, or other e-mail be the default, leave it unchecked.

Tap “Done”.
