

E-Mail Setup for Android

While PES Energize is not responsible for the setup of e-mail on your personal mobile devices, our support staff will be happy to assist you as much as possible. Depending on your specific device there may be some differences in email account steps and screen views. This document simply serves as a guide to assist you in accessing your email on these devices.

1. Open the Android Email app.

**2. You will see the Set up Email screen.
Select "Other".**

3. You will see the Add new account screen.

Enter your full email address and password here (you must know your correct password to continue).

4. After you have entered your full email and password, choose “Manual setup” at the bottom of the screen.

5. You will receive a prompt to Select account type. Choose "IMAP account".

6. Begin entering the Server Settings

Email address: i.e.

techsupporttest@energize.net

User name: your full email address

i.e. techsupporttest@energize.net

Password: your email password

Incoming Server

IMAP server: imap.us-east.atmailcloud.com

Security type: SSL (recommended)

Port: 993

Leave "IMAP path prefix" blank

Scroll down the screen to continue entering settings

Outgoing Server

SMTP Server: smtp.us-east.atmailcloud.com

Security type: SSL (recommended)

Port: 465

Be sure to toggle “Requires authentication to send emails” to the ON position

Re-enter your full email and password again

Tap “Next” to continue

7. Select your email sync based on your personal preferences.

Email sync period is how long emails are stored on your device for offline usage; i.e. you don't have access to network service.

Email sync schedule is how often you want your device to automatically check for email. The frequency of these updates can affect battery life.

When finished, tap "Done".

8. You can now edit and name your Energize email however you would like.

“Your name” is what people will see when they receive email from you.

9. Tap “Done” and you now have Energize email set up on your Android device!
