

- 1. Use clean, pulverized backfill, well compacted, and mound slightly for settling Repair paving or other surfaces (including grass) in kind.
- 2. Compact in 6" layers. Fill and compact to the Other Utility level, if applicable, then allow installation, then finish fill and compaction. Place warning tape 12" below finished grade.
- 3. Ground wire is to be a #4 SDBC (furnished and installed by Owner/Developer). Ground wire is only required when installing Underground Primary.
- 4. Where space is limited and when prior approval is given by the PES Engineer. Other Utilities may be allowed directly over Power conduits. (NOT Preferred)
- 5. If ditch crosses another utility. PES is to be in the lower position and 6" of concrete separation is required. The concrete is to extend 18" either side of the crossing.
